System Test Plan by Carson Orejola(clorejol)

NOTE: These test files are contained within the “input” folder in the project submission.

Additionally, these test files are contained in the .csv format, but are displayed here as text reflecting that format.

Should also note that these tests are edited from the original submission in Part 1 of the project created in tandem with my teammate. These tests are edited by me to work with my UI.

Test Data:

sample-rooms.csv:

```
ROOM_ID             LENGTH    WIDTH

Office              12        14

Dining Room         15        15

Living Room         25        35

Guest Bedroom       17        16

Guest Bathroom      10        8

Foyer               8         8

Kitchen             18        20
```

sample-logs.csv:

TIMESTAMP	ROOM_ID	PERCENT_CLEANED
6/1/2021 13:39	Office	78
5/31/2021 9:27	Dining Room	89
5/30/2021 10:14	Living Room	68
5/28/2021 17:22	Living Room	70
5/21/2021 9:16	Dining Room	86
5/23/2021 18:22	Dining Room	89
5/23/2021 11:51	Guest Bedroom	77
5/17/2021 4:37	Guest Bathroom	91
5/9/2021 18:44	Living Room	89
5/12/2021 18:59	Living Room	94

5/13/2021 22:20	Guest Bedroom	74
5/8/2021 7:01	Guest Bathroom	91
5/1/2021 10:03	Foyer	93
5/3/2021 17:22	Living Room	92
5/11/2021 19:00	Living Room	89

Test ID	Description	Expected Results	Actual Results

testID: testFrequencyReportValid
 	
Strategy: Testing boundary values - requesting report of one room
	Preconditions:
	
	- iHowl has been loaded successfully
	- The files **sample-rooms.csv** and **sample-logs.csv** exist in the input folder
	
	Steps:
	
	1. After the prompt that says, "**Enter room information file:** ", the user inputs **sample-rooms.csv**
	2. After the prompt that says, "**Enter cleaning information file:** ", the user inputs **sample-logs.csv**
	3. Choose to view a report of the most frequently cleaned rooms by typing "**1**" after the options are presented.
	4. When prompted for how many rooms to look at, enter "**1**."
		The program outputs the following:
		
		`Enter room information file:`
		
		`input/sample-rooms.csv`
		
		`Enter cleaning information file:`
		
		`input/sample-logs.csv`
		
		`What would you like to do? Type the number.`
		
		`View the Most Frequently Cleaned Rooms - 1`
		
		`View a Report of Cleanings by Room - 2`
		
		`View Estimated Remaining Vacuum Bag Life -3`
		
		`Quit - 4`
		
		`1`
		
		`How many rooms to view?`
			Enter room information file: input/sample-rooms.csv
			
			Enter cleaning information file: input/sample-logs.csv
			
			What would you like to do? Type the number.
			
			View the Most Frequently Cleaned Rooms - 1
			
			View a Report of Cleanings by Room - 2
			
			View Estimated Remaining Vacuum Bag Life - 3
			
			Quit - 4
			
			1

		1 Frequency of Cleanings [Living Room has been cleaned 6 times]	How many rooms to view? **1** Frequency of Cleanings [Living Room has been cleaned 6 times]
testID: testFrequencyReportInvalid **Strategy: Testing exceptions - requesting report of -4 rooms**	**Preconditions:** - iHowl has been loaded successfully - The files **sample-rooms.csv** and **sample-logs.csv** exist in the input folder **Steps:** 1. Choose to view a report of the most frequently cleaned	The program outputs the following: What would you like to do? Type the number. View the Most Frequently Cleaned Rooms - 1 View a Report of Cleanings by Room - 2 View Estimated Remaining Vacuum Bag Life -3 Quit - 4	What would you like to do? Type the number. View the Most Frequently Cleaned Rooms - 1 View a Report of Cleanings by Room - 2 View Estimated Remaining Vacuum Bag Life - 3 Quit - 4

	rooms by typing "**1**" after the options are presented. 2. When prompted for how many rooms to look at, enter "**-4**."	**1** How many rooms to view? **-4** Number of rooms must be greater than 0.	**1** How many rooms to view? -**4** Number of rooms must be greater than 0.
testID: testCleaningsByRoom **Strategy: Equivalence class - cleaning input file contains all proper information and**	**Preconditions:** - iHowl has been loaded successfully - The files **sample-rooms.csv** and **sample-logs.csv** exist in the input folder **Steps:** 1. Choose to view a report of the dates and times when	The program outputs the following: What would you like to do? Type the number. View the Most Frequently Cleaned Rooms - 1 View a Report of Cleanings by Room - 2 View Estimated Remaining Vacuum Bag Life -3 Quit - 4	What would you like to do? Type the number. View the Most Frequently Cleaned Rooms - 1 View a Report of Cleanings by Room - 2 View Estimated Remaining Vacuum Bag Life - 3

report of multiple rooms is listed	each room was cleaned by typing “**2**” after the options are presented.	**2** Room Report [Dining Room was cleaned on [05/31/2021 09:27:45 05/23/2021 18:22:11 05/21/2021 09:16:33] Foyer was cleaned on [05/01/2021 10:03:11] Guest Bathroom was cleaned on [05/17/2021 04:37:31 05/08/2021 07:01:51] Guest Bedroom was cleaned on [05/23/2021 11:51:19 05/13/2021 22:20:34	Quit - 4 **2** Room Report [Dining Room was cleaned on [05/31/2021 09:27:45 05/23/2021 18:22:11 05/21/2021 09:16:33] Foyer was cleaned on [05/01/2021 10:03:11] Guest Bathroom was cleaned on [05/17/2021 04:37:31 05/08/2021 07:01:51]

testID: testVacuumBagLife Invalid
 	
Strategy: Testing exceptions - date and time formatted incorrectly
	Preconditions:
	
	- iHowl has been loaded successfully
	- The files **sample-rooms.csv** and **sample-logs.csv** exist in the input folder
	
	Steps:
	
	1. Choose to view a report of the estimated remaining vacuum bag life by typing "**3**" after the options are presented.
	2. When prompted for a date and time enter: **6/30/2021**
		The program outputs the following:
		
		`What would you like to do? Type the number.`
		
		`View the Most Frequently Cleaned Rooms - 1`
		
		`View a Report of Cleanings by Room - 2`
		
		`View Estimated Remaining Vacuum Bag Life - 3`
		
		`Quit - 4`
		
		`3`
		
		`Please enter date and time in format MM/dd/yyyy HH:mm:ss`
		
		`6/30/2021`
